

We Fit All Sizes

The last two years have been quite complicated for everyone but here at Ronchi we have continued to work relentlessly in order to offer our clients new solutions. We have invested in the young work force and with the support from several universities we have been able to develop two new R&D proposals of excellence: Unique and FaStyle.

Universities such as Statale di Camerino, Pisa, Catanzaro, Federico II in Naples as well as prestigious manufacturing companies i.e. Aboca, Chiesi e Menarini have chosen them for their laboratories.

Unique mono punch is suitable for fast checking the feasibility of the product; flexible and powerful Unique is absolutely reliable.

FaStyle has been redesigned and beside being elegant and detailed it offers a three channel software : compression , pre compression and extraction.

To fullfill even more performing needs our range has been completed with FAtop line, which includes a software for management and self regulation of the tablet weight.
